Ecologically Aware & Environmentally Friendly Laminate

EUROSTYLE and EUROTREND laminate products are manufactured in a manner in line with ecological, socially responsible and economic principles of sustainable forestry. The laminate consists of 90 percent wood and is manufactured exclusively with wood from domestic and sustainably managed forestry in the flooring production. This is guaranteed by the PEFC (Pan European Forest Certification), an independent testing institute. EUROSTYLE and EUROTREND laminate is robust, durable; thus resources are conserved.

Flooring is Manufactured...

- With low-emissions.
- Mindfully of natural resources.
- Without pesticides.
- Without damaging heavy metals.

In addition to this, EUROSTYLE follows the German and European E1 Classification guidelines for laminate flooring and wooden composites, according to which detriments to health are prohibited. Your old EUROSTYLE laminate floor can be disposed of easily with your household waste.
